PROFESSIONAL SUMMARY

Computer Science graduate from College of Engineering Guindy with hands-on experience in full-stack development, machine learning, and AI-driven healthcare automation. Skilled in Python, TypeScript, React.js, Node.js, PostgreSQL, REST APIs, data structures, and LLM evaluation, with athenahealth internship experience and **700+** coding challenges solved on [LeetCode](#) and [GeeksforGeeks](#).

EDUCATION

B.E. Computer Science and Engineering - **College of Engineering Guindy, Anna University** | 2022 - 2026 | CGPA: 9.3/10
High School, **Mahatma Montessori School**, Madurai | 2019 – 2022 | 12th: 596/600 | 10th: 484/500

EXPERIENCE

Product Engineering Intern - athenahealth Technology Pvt Ltd Jan 2026 – Present

- Worked across **athena Medical Coding** and **ECR Denials Management** teams on **production healthcare workflows**, including **AI-assisted coding**, claim processing, denial resolution, and appeal management.
- Evaluated open-source LLMs using **AWS SageMaker** and **LM Studio** across **10K+** encounter test cases, benchmarking accuracy, latency, precision, recall, and **structured-output reliability**.
- Strengthened **platform reliability** and compliance through PHI log redaction, GenAI fallback logic, E/M **prompt updates**, V2 endpoint migration, rollout cleanup, **React/TypeScript** workflow enhancements, **Playwright E2E** automation, regression testing, and **production triage**.
- Built ECR appeal workflow enhancements using React/TypeScript for document selection, appeal success confirmation/navigation, charge-level POS support, mocked API routes, and failure-state validation.

Research Intern - Dept. of Computer Science and Engineering, IIT Madras May 2025 – July 2025

- Researched Boolean function analysis, **decision tree** complexity, **junta** functions, query complexity, and **Fourier analysis** in learning theory. [View Certificate](#)

SKILLS

TECHNICAL

- **Programming Languages:** Python, Java, C, C++, JavaScript, TypeScript
- **Web Development:** React.js, Node.js, Express.js, Spring Boot, HTML, CSS, Tailwind CSS
- **Database & Data Tools:** MySQL, MongoDB, PostgreSQL, pgAdmin, Snowflake
- **Tools & Technologies:** AWS SageMaker, LM Studio, Bruno, Docker, Git, Linux, Jira, Confluence, Claude

PROJECTS

Real-Time Threat Detection System: [View Project](#)

- Built a real-time CCTV threat detection system using **YOLOv11**, **Transformer**, **LSTM**, and a **React.js** dashboard with location, timestamp, and live map alerts.

SecurePrompt: Multi-Layer Detection Framework for Prompt Injection Attacks

- Designed an LLM security framework to detect **prompt injection** and **jailbreak attacks** using prompt mutation, KL divergence, semantic similarity, **BERT**-based policy validation, and XAI audit logs.

Blog Sharing Platform: [View Project](#)

- Implemented a full-stack Blog Sharing Platform using **Spring Boot** and **React.js**, with blog posting, comments, likes, follow system, saved blogs, and **microservice**-based modules.

Disaster Management System: [View Project](#)

- Developed a **React Native** emergency reporting app with **Express.js** and **MongoDB**, enabling geolocation, image-based reports, and crowdsourced response decisions.

Vehicle Management System: [View Project](#)

- Built a **React.js**, **Express.js**, and **PostgreSQL** vehicle management system for vehicle records, certificates, insurance, missing-vehicle complaints, and police authentication.

CERTIFICATIONS

[View Certificates](#)

- Certified in Machine Learning A-Z AI, covering practical applications using Python in Udemy.
- Certified in Neural Networks and Deep Learning, with a focus on key algorithms in Coursera.

CAMPUS INVOLVEMENT

- Served as **President** of the **Computer Society of Anna University**, leading domain teams and organizing technical events, workshops, and placement-focused student initiatives.
